

- **Name:** Sang Hee Cho
 - **Current Position & Affiliation:** Chonnam National University Medical School
 - **Country:** Republic of Korea
-

• Educational Background:

- 1990-1996: Preschool and School of Medicine, Chonnam National University, Gwangju, Conferred with Bachelor of Medicine
- 1997-1999: Graduate school, Chonnam National University
Majoring in Medicine, Conferred with Master of Medical science
- 1999-2003: Doctor's Course of Graduate School, Chonnam National University
Majoring in Medicine, Conferred with Doctor of Medical science

• Professional Experience:

- 2016.1 ~ 2019.12: Director of Clinical trial center in Chonnam National University Hwasun Hospital

• Professional Organizations:

- Korean Society of Medical Oncology
- Korean Cancer Study Group
- The Korean Cancer Association
- American Society of Clinical Oncology
- American

• Main Scientific Publications:

1. PRODIGY: A Phase III Study of Neoadjuvant Docetaxel, Oxaliplatin, and S-1 Plus Surgery and Adjuvant S-1 Versus Surgery and Adjuvant S-1 for Resectable Advanced Gastric Cancer. *JCO* 2021;16
2. Impact of UGT1A1 Genotype on the Efficacy and Safety of Irinotecan-based Chemotherapy in Metastatic Colorectal Cancer. *Cancer Sci.* 2021 Jul 30
3. A heptamethine cyanine dye serves as a potential marker for myeloid-derived suppressor cells. *Am J Cancer Res.* 2021 Jun 15;11(6):2853-2866
4. Lgals3bp suppresses colon inflammation and tumorigenesis through the downregulation of TAK1-NF- κ B signaling. *Cell Death Discov* 2021; 6;7(1):65.
5. Association between ALDH2 and ADH1B polymorphism and the risk for colorectal cancer in Koreans. *Cancer Res Treat* 2021;53:754-762
6. Multicenter phase III trial of S-1 and cisplatin versus S-1 and oxaliplatin combination chemotherapy for first-line treatment of advanced gastric cancer (SOPP trial). *Gastric Cancer.* 2021 Jan;24(1):156-167
7. Identifying Novel Susceptibility Genes for Colorectal Cancer Risk From a Transcriptome-Wide Association Study of 125,478 Subjects. *Gastroenterology.* 2021 Mar;160(4):1164-1178.e6

15th Annual Meeting of the Korean Society of Medical Oncology & 2022 International Conference

8. Association between ALDH2 Polymorphism and Gastric Cancer Risk in a Korean Population. J Korean Med Sci. 2020 May 4;35(17):e148
9. Observational Study of Peritoneal Washing Cytology-Positive Gastric Cancer without Gross Peritoneal Metastasis in Patients who Underwent Radical D2 Gastrectomy. Sci Rep. 2020 Jun 12;10(1):9549
10. Fibroblast growth factor receptor 4 increases epidermal growth factor receptor (EGFR) signaling by inducing amphiregulin expression and attenuates response to EGFR inhibitors in colon cancer. Cancer Sci. 2020 Sep;111(9):3268-3278
